### About Silicon Motion:

We are a fabless semiconductor company that designs, develops and markets high performance, low-power semiconductor solutions for the multimedia consumer electronics market. We have three major product lines: mobile storage, mobile communications, and multimedia SoCs. Our mobile storage business is composed of microcontrollers used in NAND flash memory storage products such as flash memory cards, USB flash drives, SSDs, embedded flash applications, and card readers. Our mobile communications business is composed of mobile TV IC solutions, CDMA RF ICs, and electronic toll collection RF ICs. Our multimedia SoCs business is composed of products that support portable multimedia players, DAB systems, PC cameras, and embedded graphics applications.
